Join us for Speed Up the Cool Down, a networking event with change makers from around the world. It will be an opportunity to connect with a growing Regenerative Agriculture movement aimed at speeding up the drawdown of carbon and regenerating the soil, our health, communities, and the planet.

At COP 23, we know that time is of the essence - both in the race to meet the Paris Agreement and to make as many connections as possible to advance collaborations and progress. Learn about innovative projects and share best practices.
